The Oaks CE Federation- Year 1 and 2 Curriculum Overview

Literacy

This term, we will explore *One Diwali Day*, *Molly, Oliver and Dexter* and *Fox and the Mystery Letter*. We will develop our reading, writing and comprehension skills through exciting stories, exploring characters, settings and using our imagination to create our own writing.

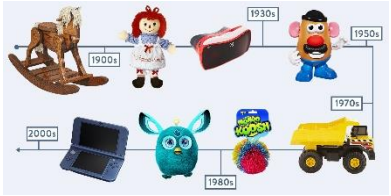

History

In History, children will explore toys from the past and present, discovering how toys have changed over time. They will compare old and new toys, exploring how LEGO fits into the history of toys and how designs and materials have changed over the years.

Music

This term, we will explore how changes in tempo and dynamics can affect a song.

PSHE

Celebrating difference

We will be celebrating our differences and exploring what makes each of us unique. We will learn about stereotypes, building positive relationships and the importance of treating others with kindness. We will also explore how to recognise right from wrong and keep ourselves safe.

DT

This term, we will explore the design and making process, learning how to design and create a functional product that meets a design brief. We will practise joining fabrics using running stitch, glue and staples, before evaluating our finished products and considering how well they meet the brief.

Autumn 2 2026

Lego Legends!

RE

Incarnation

In RE, we will explore why Christmas matters to Christians. We will learn about the Nativity story and consider why the birth of Jesus is so important to Christian beliefs and celebrations.

Science

Seasonal changes

This term, we will explore the four seasons and investigate how the weather, trees, natural world and daylight hours change throughout the year. We will develop our observation skills, learn about seasonal events and activities, and plan and present our own weather reports.

PE

This term, we will develop our ball skills by practising rolling, throwing, catching and receiving over different distances. We will improve our ability to track and control a ball, use our feet to send and receive, and apply these skills in small team games.

Maths

This term, we will develop our mathematical skills through addition, subtraction, multiplication and division. We will also explore geometry, fractions and number and place value, building our confidence in using numbers and solving problems.
